29mm RC XLT Disrupter on Tripod

**DESCRIPTION**

The 29mm RC XLT is Proparms' largest recoilless titanium disrupter. With its significantly reduced recoil and weight of less than 5 kg, it is perfect for medium and large robot applications, where it can be deployed quickly and efficiently. The lack of recoil reduces stress to robotic platforms, ensuring safe and reliable operations. Mounted on a flexible tripod, the 29mm RC XLT can be positioned to approach complex firing angles. This allows operators to successfully disrupt and de-arm the most challenging encounters. This flexibility makes it a popular choice for bomb disposal units and special forces worldwide. The 29mm RC XLT is ideal for rapid deployment in emergency situations. The maximum recommended standoff distance for the 29mm RC XLT is 3 meters (10 ft.) for water shots, depending on the target. Choose the 29mm Recoilless XLT for its proven performance, reliability, and ease of use in a variety of situations. Experience the ultimate solution for recoilless disrupting and de-arming.
